IT'S HOW TODAY'S GUESTS WATCH

Roomcast™

powered by Google Chromecast

Your guests have a world of content in the palm of their hands. With Netflix, YouTube, Pandora, Showtime, ESPN and thousands more apps, they access all their favorite content on their smart devices.

Roomcast makes it really simple for guests to stream content from their favorite services to the guestroom TV.

Roomcast Features

● **Chromecast**
• Guest streaming content via Chromecast
• Using cast enabled apps that work for both iOS and Android devices

● **Bluetooth**
Bluetooth for wireless audio streaming

● **HDMI**
An HDMI port on the rear of the Roomcast can be connected to a HDMI module to provide guest facing HDMI

● **Personal Area Network**
Roomcast creates a secure Personal Area Network (PAN) for each room

After joining the network, guests will discover the familiar "cast button" in all of their cast-enabled apps. There is nothing to download; no email or passwords to enter. And yes, it works on both Android and iOS devices. It couldn't be simpler: join the room network, launch your favorite cast-enabled app and cast.

Roomcast is a solution that is simply added to your existing TV system. Make your guests feel at home by providing them with the freedom to enjoy their own content.

Roomcast™

powered by **Google** Chromecast

THE EASY WAY TO STREAM

Easy for Guests

One press of the Roomcast dial (or remote) brings up Roomcast on the TV, where guests will discover a private personal area network. After joining they can open any cast-enabled app and tap the Cast button to display their favorite content on the big screen. Everything is controlled from the guest's phone or tablet, using the mobile apps they already know and love. They can even keep using their phone for other things without disrupting what's playing.

Easy for Hotels

Roomcast is an "over-the-top" streaming solution that is simply added to your existing guestroom TV system. There's no head-end equipment, server or software to install. Does your property have Ethernet ports? Plug in the included Ethernet cable and you're ready to go. **If no Ethernet you can use wireless! Just connect Roomcast to power and the TV.** Try it in one room or thousands. It's that simple.
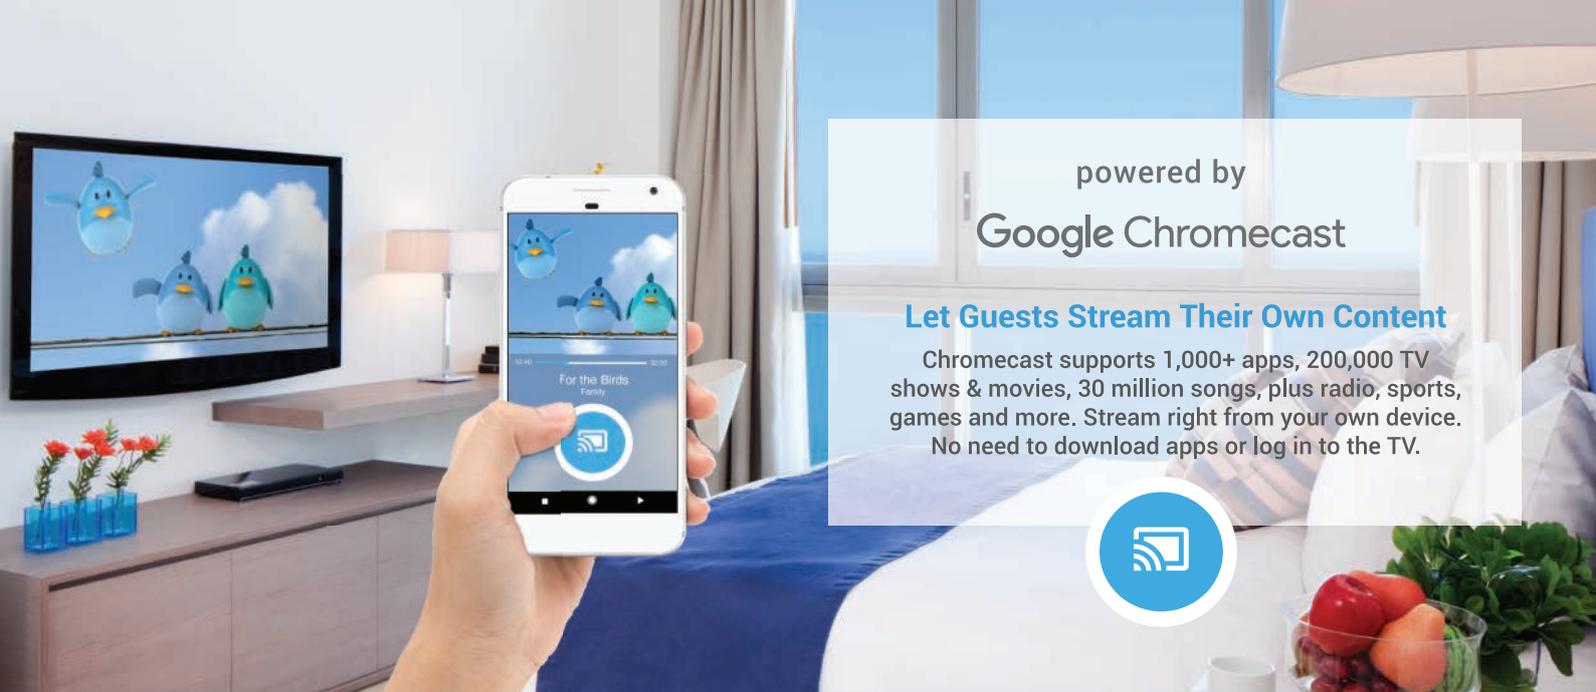

Roomcast was designed for easy secure setup: no servers, no software, no teams of installers, no contracts.

Guest Can Stream Their Content

Keep up with your favorite shows on the road. Now you can use Chromecast to stream all your media from your favorite apps and services you already subscribe to.

1. Press the remote and follow the instructions on your TV

2. Join the Personal Area Network

3. Open your favorite apps and tap the Cast button

Simple To Set-Up

1. Connect HDMI and power and to your Ethernet or Wi-Fi network

2. Enter the room number into the setup screen and whitelist the MAC address if required

3. The room is now Cast-enabled. No servers, no software and no contracts.

Fast and simple set-up with set-up wizard

The Setup Wizard steps through the key configuration parameters for Roomcast and runs only once, on initial startup. If setting up multiple units the parameters can be saved in a clone file on a USB drive for fast deployment.

powered by

Google Chromecast

Let Guests Stream Their Own Content

Chromecast supports 1,000+ apps, 200,000 TV shows & movies, 30 million songs, plus radio, sports, games and more. Stream right from your own device. No need to download apps or log in to the TV.
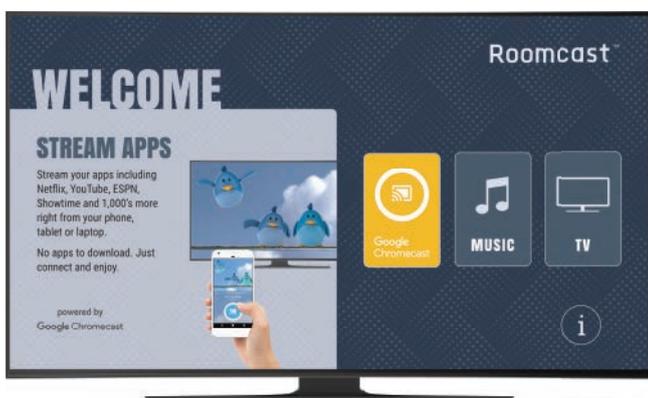

SIMPLE

Guests use their own mobile devices. Nothing to download and nothing new to learn. Simply "Join & Cast."

UNIVERSAL

All guests will be supported whether they use iOS or Android smartphones / tablets, or laptops with the Chrome browser.

SECURE

Guest's private information is never exposed and personal area network ensures content streaming is contained to each guest room.

COMPLETE

Chromecast supports 1,000+ apps, 200,000 TV shows & movies, 30 million songs, plus radio, sports, games and more.

The Solution Includes

● **Roomcast Hub**
Box mounts under or behind desk, or behind TV

● **Roomcast Dial / Roomcast Remote**
Place at the nightstand, the desk, or next to the TV

● **Existing Hotel TV**
Simply plug in with HDMI

● **Guests' Mobile Device**
Smartphones including iPhone and Android, tablets and laptops with Chrome browser

Custom Solutions
We'll Make It Yours
Available if you wish to customise the Roomcast menu and welcome screen on the TV. We can add your logo, your chosen background colour or image and button colours. Please ask for pricing for UI customisation.

Roomcast ™

powered by **Google** Chromecast
